

ANNE CHARLOTTE SALIBA - DESIGNER AND PAPER SCULPTOR

She creates lamps from scratch, making them evolve and grow as she works, in her studio. Her collections are part of an eco-design approach that combines elegance, finesse, and respect for the environment.

The beauty of the outside world, and more specifically that of nature, is of real importance to the designer, as her influences come mainly from the realms of plants and animals. She takes her inspiration from the delicate lines and membranes of certain veined plants, as well as the bioluminescence and the graceful movements of abyssal species, thus giving a living character to some of her lamps.

With a degree in Applied Arts at Lisaa Rennes, specialising in interior architecture and object design, Anne Charlotte Saliba also creates custom pieces for spaces according to their stories and tales. This is why she likes to venture out for commissions.

With each new light, a new story ...

Anne Charlotte Saliba focuses all her attention on light

Temporary Grand Palais

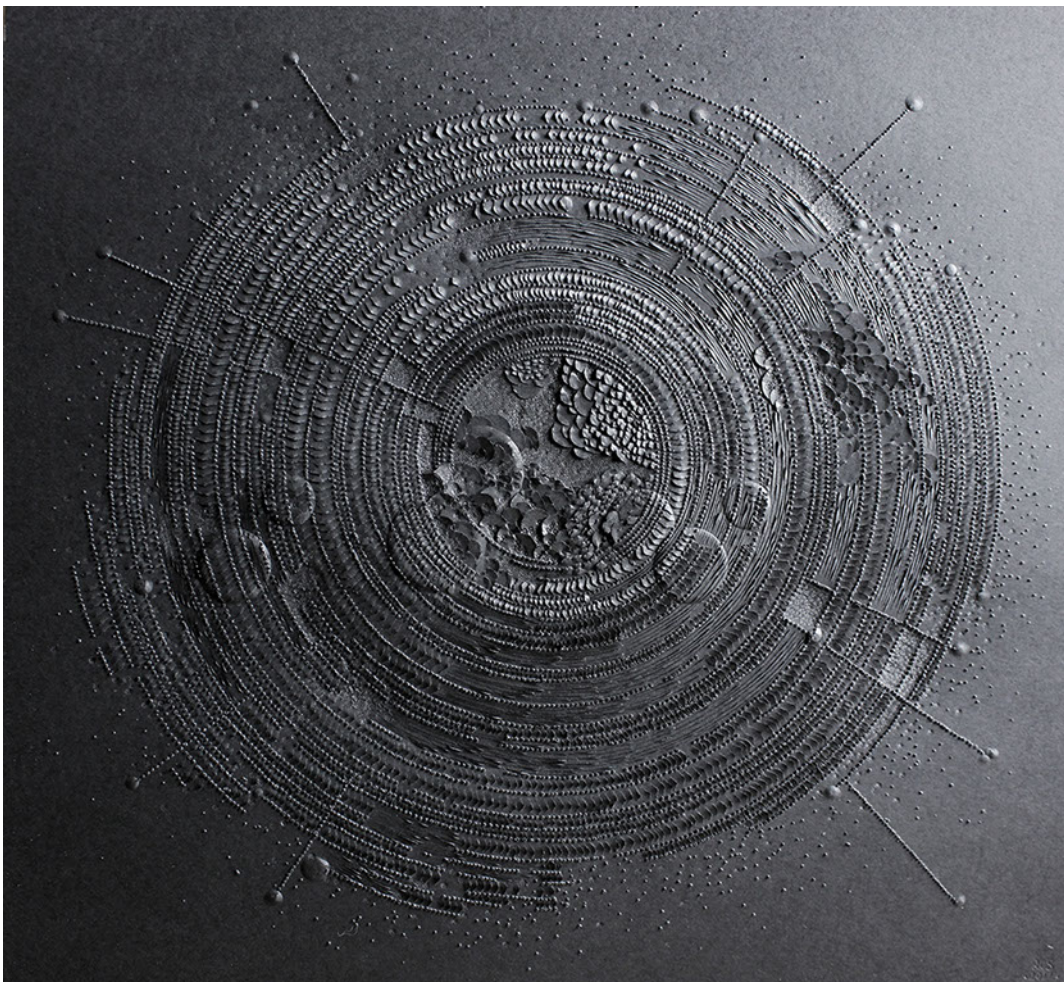

Révélations

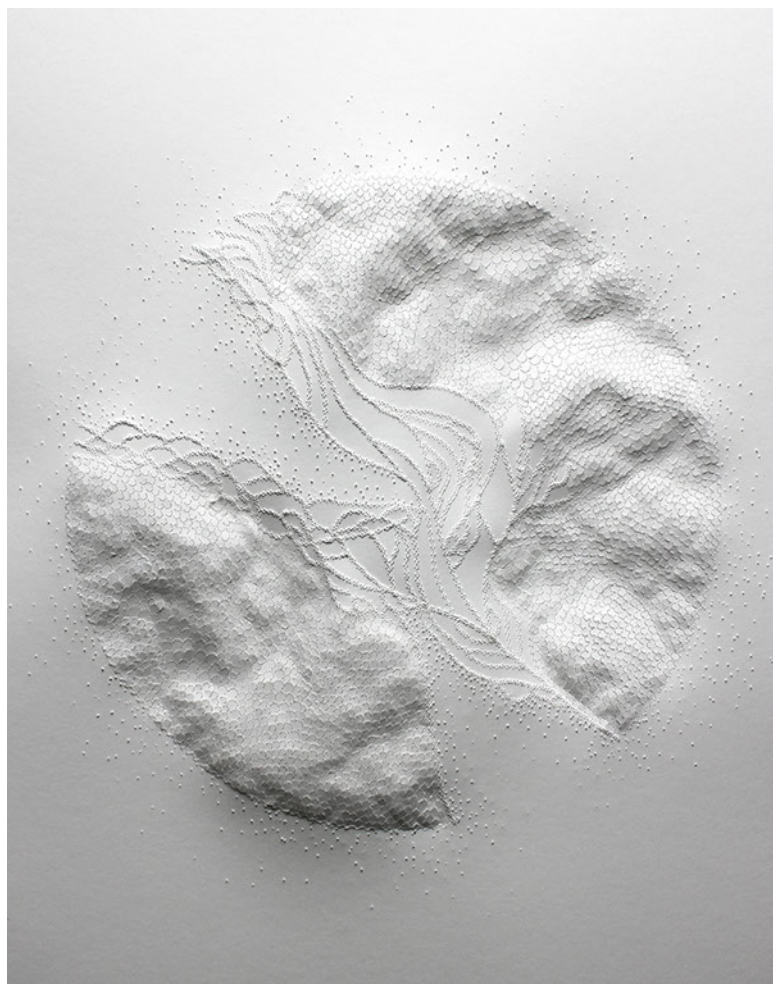

International Biennial of Crafts and Creation

Held every two years, Révélations is the not-to-be-missed event that celebrates **French and international creation**. Conceived and created by **Ateliers d'Art de France**, a professional organisation representing the 281 French fine crafts, the biennial is the **major economic event of the sector**. The stage for countless meetings, Révélations brings together the creation market's professionals and fine crafts aficionados around unprecedented works and exceptional expertise.

"We imagined an event that would celebrate the strength and the creative vitality of material artists around the world. With this unique event, we wanted to transcend craftsmanship, reveal contemporary creation and inspire the talents of tomorrow. Material artists express a vision of society that makes decisions for its future, offering a different way of life: creating, passing along, and lasting!"
